Dear FCC,  
If you are going to police the traffic and weather stations provided by XM then I think you should tune into your local traffic and weather stations again. Local programming is inaccurate and not frequently broadcasted enough. XM provides updated and constant reports that can be heard 24/7. Please do not take away their right and our right to freedom of speech because the radio stations are losing revenue to XM Radio's brilliant concept.

Sincerely,

Nikki Jon Rasnic
